(54) Title: METHOD FOR DETECTING EXPRESSION OR CLUSTERING OF CELL SURFACE MOIETIES

(57) Abstract: The present disclosure relates to a method for detecting and/or quantifying expression of at least a first cell surface moiety and of a second cell surface moiety in a patient sample, and to a method for detecting and/or quantifying clustering of at least a first cell surface moiety with a second cell surface moiety in a sample, wherein the sample is exposed to a molecule having binding specificity for the at least first and second cell surface moieties. The present disclosure further relates to a method for predicting the responsiveness of a subject to such binding molecule, a method for determining the effectiveness of such binding molecule, a method for confirming the mode of action of such binding molecule, a method for treating a subject, and a method for screening one or more test agents for the ability to induce clustering of a first cell surface moiety with a second cell surface moiety.
