

Abstract

Disclosed is use of a compound of formula (I) or a stereoisomer, a tautomer, a pharmaceutically acceptable salt, an eutectic thereof, or a composition thereof in the preparation of a drug for treating a complement factor B-mediated disease. Also disclosed is a method for treating the complement factor B-mediated disease. The method comprises administering an effective dose of the compound of formula (I) or the stereoisomer, the tautomer, the pharmaceutically acceptable salt, the eutectic thereof, or the composition thereof.
