

## ABSTRACT

Provided is an air blower capable of preventing dust from scales or dead bodies of trapped insects from being scattered to the outside. In the air blower including a casing (11, 21) having an  
5 intake port and a discharge port (13), an air-blowing fan (30) disposed inside the casing (11, 21) to take in air through the intake port and discharge air from the discharge port (13), and a filter (17) filtering the air taken in through the intake port, an insect trapping  
part 25 which traps insects is disposed at a ventilation path between  
10 the intake port and the filter 17.
