ABSTRACT

APPARATUS FOR FIXING A WIG AND
METHOD FOR FIXING A WIG USING THE APPARATUS

An apparatus for fixing a wig to head of a user, including a flexible plane sheet including a first opening and a second opening, a plurality of monofilaments each including a swollen head and protrusively provided on a first side of the flexible plane sheet, a first adhesive layer provided so as to cover the monofilaments, a net member provided on a second side of the flexible plane sheet, and a second adhesive layer provided on the net member of a first half area, the flexible plane sheet being divided into the first half area and a second half area by a line bisecting the flexible plane sheet is provided. The first opening is provided on the line bisecting the flexible plane sheet while having a thin and long shape so that a part of natural hair of the user passes through the first opening, and the second opening is provided at a predetermined position on the second half area so that other part of the natural hair of the user passes through the second opening.
