

ABSTRACT

DOCUMENT MANAGEMENT SYSTEM, DOCUMENT MANAGEMENT DEVICE, AND
DOCUMENT MANAGEMENT PROGRAM

A document management system includes an image reading unit, an image data dividing unit, an information acquisition unit, and a process unit. The image reading unit reads images of a plurality of documents and generates read image data of the plurality of documents. The image data dividing unit divides the read image data, and generates image data for respective documents included in the plurality of documents. The information acquisition unit acquires information relating to the plurality of documents. The process unit associates the information acquired by the information acquisition unit with the respective image data for the respective documents.
