(54) Title: SYSTEMS AND METHODS FOR EVENT DRIVEN BAGGAGE MANAGEMENT

(57) Abstract: Systems and methods for event driven baggage management are disclosed. Readers (12) are used to detect and monitor the location of tags (10) attached to baggage (11) as the baggage moves from the point at which a traveler drops off the baggage at the origin (14) of a trip to the point at which the traveler picks up the baggage at a destination location (15). Methods and systems that are capable of detecting when a bag has been lost or misdirected and searching for the lost or misdirected bag are also disclosed. Notification may be sent directly to a traveler or the carrier when specified baggage events occur. Additionally, systems and methods for communicating a destination of an object to a wireless earphone device (84) worn by an object handler (83) are also disclosed.
