

ABSTRACT

IMAGE PROCESSING METHODS AND APPARATUSES, COMPUTER READABLE STORAGE MEDIA AND ELECTRONIC DEVICES

Embodiments of the present disclosure provide image processing methods and apparatuses, computer readable storage media and electronic devices. The image processing method includes: obtaining an original photographed image and original depth information of at least one pixel point in the original photographed image; determining blurring degree data of each of the at least one pixel point in the original photographed image according to blurring parameter data and the original depth information of the at least one pixel point; and performing blurring processing on the original photographed image according to the blurring degree data of the at least one pixel point to generate a post-processing result image.
