

Preparation method for pyrrolidine-2-carboxylic acid derivatives

Abstract

5

The present invention relates to the field of medical synthesis, in particular to a preparation method for pyrrolidine-2-carboxylic acid derivatives. The present invention adopts the following technical solution: providing a compound having a structure of formula (E), wherein R is R₁ or R₂, R₁ is C₁-C₆ an alkyl, benzyl, p-methoxybenzyl, or p-nitrobenzyl group, and R₂ is hydrogen;
10 R₃ is a protecting group of the carboxyl group; and P₁ is a protecting group on nitrogen.
