PROPHYLACTIC OR THERAPEUTIC AGENT FOR DISEASE OR CONDITION ASSOCIATED WITH ANGIOGENESIS, AND VEGF PRODUCTION INHIBITOR

ABSTRACT

A problem to be solved by the present invention is to provide a novel VEGF production inhibitor.

The present invention is a VEGF production inhibitor comprising hsa-miR-140-5p and hsa-miR-126-3p. An agent comprising hsa-miR-140-5p, for inhibiting VEGF production through combined use with hsa-miR-126-3p. An agent comprising hsa-miR-126-3p, for inhibiting VEGF production through combined use with hsa-miR-140-5p is provided.
