

ABSTRACT

The present invention discloses a first connector, a connecting assembly and a connecting system. The first connector includes a first connector body, and one side of the first connector body protrudes to form a connecting boss, the other side of a connector body is provided with a mounting part, the mounting part is used to be locked in the first mounting hole of the first member, and the first connector body is fixed arranged an operating part between the connecting boss and the mounting part, the operating part is arranged at a distance from the connecting boss to form a connecting groove, and the operating part is used to be driven by an external tool to drive at least a part of the first connector body to rotate ; wherein, the outer side surface of the operating part has at least one operating plane or operating hole or operating bump or operating groove, or, the cross section of the operating part is adapted to the cross section of the sleeve. The invisibility can be improved after the finished furniture being connected according to the connecting assembly of the present invention.
