Claims

1. A board game for a plurality of players to ~~learn~~ practise arithmetic, the board game comprising:

a plurality of game pieces representing the plurality of players, each of the plurality of players having a corresponding first number of tokens;

a dice rollable for advancing each of the plurality of game pieces;

a vessel for storing a second number of tokens; ~~and~~

a game board comprising a plurality of locations extending around a perimeter of the game board, the plurality of locations delineated for advancement of each of the plurality of game pieces according to a roll of the dice~~,~~; and

a plurality of arithmetic functions indicated on the plurality of locations, such that each delineated location is associated with an arithmetic function,

wherein ~~each delineated location indicates~~ an arithmetic function ~~operable~~ is required to be worked by ~~each of the plurality of players~~a player when the representing game piece arrives on ~~each~~ a delineated location associated with the arithmetic function; and

wherein working of the plurality of arithmetic functions allows the plurality of players to practise arithmetic.

~~wherein the operation of the arithmetic function is dependent on the corresponding first number of tokens; and~~

~~wherein the corresponding first number of tokens is changeable based on a result of the operated arithmetic function.~~

2. The board game according to claim 1, wherein the working of an arithmetic function is dependent on the corresponding first number of tokens.

3. The board game according to claim 2, wherein the corresponding first number of tokens is changeable based on a result of the worked arithmetic function.

~~2~~4. The board game according to claim ~~1~~3, wherein any change in the corresponding first number of tokens comprises moving of tokens by the corresponding player between the corresponding first number of tokens and the second number of tokens stored in the vessel.

~~3~~5. The board game according to claim 1, wherein at least one from the plurality of locations represents a bonus location for changing the corresponding first number of tokens.

~~4~~6. The board game according to claim ~~3~~5, further comprising a plurality of bonus cards receivable by the plurality of players when the representing game piece arrives at the bonus location, wherein each of the bonus cards represents a bonus function ~~operable~~ required to be worked by each of the plurality of players, the ~~operation~~ working of the bonus function being dependent on the corresponding first number of tokens.

~~5~~7. The board game according to claim ~~4~~6, wherein the change in the corresponding first number of tokens as a result of the ~~operated~~ worked bonus function comprises moving of tokens by the corresponding player between the corresponding first number of tokens and the second number of tokens stored in the vessel.

~~6~~8. The board game according to any one of claims 1 to ~~5~~7, wherein both the first and second numbers of tokens comprises one of game money and pieces of paper.

~~7~~9. The board game according to any one of claims 1 to ~~5~~7, wherein the game board comprises at least three edges.

~~8~~10. The board game according to any one of claims 1 to ~~5~~7, wherein each of the plurality of locations is labeled on the game board with a geometrical shape.
