

ABSTRACT

Disclosed in embodiments of the present disclosure are an indication method and apparatus, a device, and a storage medium, which can be applied to a communication system. The method includes: acquiring codebook parameter information indicated by a network device, the codebook parameter information including the number of codebook parameters configured for a transmission/reception point (TRP) or TRP group; and sending indication information to the network device, the indication information being used for indicating an index value of a codebook parameter selected by a terminal device for the TRP or TRP group, and the index value being related to the number of codebook parameters. Implementation of the method of the present disclosure can effectively improve the indication effect in respect of a codebook parameter while reducing the indication overhead corresponding to the codebook parameter.
