(54) Title: SHAVING APPARATUS WITH DRIVE FOR SETTING AN OPERATIONAL PARAMETER

(57) Abstract: The invention relates to a shaving unit (8) for a shaving apparatus (1), comprising a cutting unit (10a, 10b), a main input spindle (28) coupled to each cutting unit (10a, 10b) to drive an internal cutting member (16a, 16b), and a system (11a, 11b) for adjusting operational parameters of the shaving unit (8). According to the invention the adjustment system (11a, 11b) comprises an adjustment input drive member (13a, 13b) drivable by the spindle (28), a unidirectional coupling member (25a, 25b) for coupling the spindle (28) and the member (13a, 13b), when rotating in a first direction, such that the member (13a, 13b) is driven by the spindle (28), and to provide a decoupled condition of the spindle (28) and the member (13a, 13b), when the spindle (28) rotates in a second direction, such that the spindle (28) is prevented from driving the member (13a, 13b).
