(54) Title: BRACKET

(57) Abstract: The present invention relates to a method of manufacture of a bracket (1) to be magnetically attached to a load supporting metallic surface (20), the bracket having a frame with a plurality of magnet fixing locations (6, 7). The method comprises the steps of:- a) mounting a planar magnet (4, 5) to each of said magnet fixing locations using a flowable settable bonding material; b) magnetically attaching a planar metallic sheet to said planar magnets; c) pressing the frame and metallic sheet together to apply a pressure to the bonding material prior to setting whereby all the magnets are accurately aligned on a common plane defined by the metallic sheet; and d) allowing the bonding material to set to fix each magnet to a said magnet fixing location.
