(54) Title: APPLICATION MARKETPLACE FOR VIRTUAL DESKTOPS

FIG. 1A

(57) Abstract: Systems and methods are presented for accessing an application available from a data center of a program execution service. The metadata associated with a user computing device may be used to determine whether the user computing device is authorized to access the application through a virtual desktop instance. At least a portion of the application may be executed by the virtual desktop instance and provided to the user. Applications may be purchased, licensed, or rented by a user.
