CLAIMS

1. Use of a pharmaceutical composition in the manufacture of a medicament for treating nocturia in a subject, wherein the pharmaceutical composition comprises one or more prostaglandin pathway inhibitors in combination with acetaminophen and ibuprofen,

wherein said pharmaceutical composition is formulated for immediate-release, delayed-release, or extended-release,

wherein said effective amount reduces the urge to urinate when the bladder is less than 100% full in relation to its working volume, and

wherein said one or more prostaglandin pathway inhibitors are not analgesics, and said one or more prostaglandin pathway inhibitors, acetaminophen and ibuprofen are the only pharmaceutically active agents in the composition.

2. The use of Claim 1, wherein the one or more prostaglandin pathway inhibitors are selected from the group consisting of inhibitors of prostaglandin activity, inhibitors of prostaglandin synthesis, inhibitors of prostaglandin transporter activity, inhibitors of prostaglandin transporter expression, inhibitors of prostaglandin receptor activity, and inhibitors of prostaglandin receptor expression.

3. The use of Claim 1, wherein said medicament is to be administered orally.

4. The use of Claim 1, wherein said pharmaceutical composition is formulated for immediate release.

5. The use of Claim 1, wherein said pharmaceutical composition is formulated for extended release.

6. The use of Claim 1, wherein said pharmaceutical composition is coated with an enteric coating.

7. The use of Claim 1, wherein said pharmaceutical composition is to be administered by direct injection into bladder muscle.
