(54) Title: BROADCAST RECEIVING SYSTEM COMPRISING A COMPUTER AND A DECODER

(57) Abstract

A combined computer and decoder system for receiving broadcast digital data transmissions, characterised in that the decoder (2020) comprises a routing means (2032), broadcast digital data received at the decoder (2020) and destined for the computer (2027) being identified and routed to applications within the computer by said routing means. The computer (2027) may further include control means (2038) for controlling the configuration of the decoder, such as the selected channel frequency of the decoder.
