

COAXIAL INTERCONNECT DEVICES AND METHODS OF MAKING THE SAME

ABSTRACT

An electronic interconnect device and methods of making the device. The device comprises a coaxial connector (18) comprising a dielectric material having a center opening and isolated electrically conductive interior and exterior surfaces (34a, 34b). The coaxial connector having first and second ends, the first end for attachment to an electronic package (24) and the second end for pluggable attachment to a PC board.
