

ABSTRACT

A simulation device includes a display device (3), a display device (4), a display device (5), a display device (6), a storage device (7), an input device (8), an extraction unit (20), and a display control unit (21). The storage device (7) stores a plurality of pieces of image data. Each of the plurality of pieces of image data represents an interior design of a car of an elevator. The display control unit (21) displays a piece of image data extracted by the extraction unit (20) on the display device (3), the display device (4), the display device (5), and the display device (6).
