

ABSTRACT

COMPOSITION FOR TREATING LIVER DYSFUNCTION

[Problem]

It is an object of the present invention to provide a
5 means for treating liver dysfunction.

[Solution]

The above object was achieved by providing a
composition containing skeletal myoblasts for treating
liver dysfunction or improving liver function, in which the
10 liver dysfunction can be hepatitis, liver fibrosis, liver
cirrhosis, liver cancer, or liver failure; and the
composition can be used for promoting the proliferation of
liver cells, regeneration of the liver tissue and/or
angiogenesis, and providing a method for treating liver
15 dysfunction, including a step of treating applying the
composition to a site exhibiting liver dysfunction.
