

ABSTRACT

MULTIFUNCTIONAL PORTABLE BLUETOOTH SPEAKER

A multifunctional portable Bluetooth speaker is disclosed. It includes a microphone, a speaker body and a waterproof silicone cover. In the present invention, through the transmission of several audio source signals and the design of the waterproof silicone cover, the speaker body can not only play music directly, but also provides synchronized vocals and music play through the microphone with waterproof function. The user's singing voice can be recorded in the cloud through the device connected with the Bluetooth module or broadcast live.
