(54) Title: STEEL CONTAINER, ESPECIALLY INTENDED FOR THE TRANSPORT OF BULK GOODS

(57) Abstract: Inside a steel container (1, 17, 23), a bin (3) of corrosion-resistant material is fitted. This bin (3) is fastened to the container walls. The side walls and the top wall of the bin are substantially identical in shape to those of the steel container. The container is intended for the transport of bulk goods, especially plastics particle material, the contamination of this material by steel particles, which have come loose as a result of corrosion, being prevented.
