(54) Title: MEASURING SCOOP AND SUPPORT FOR A CONTAINER

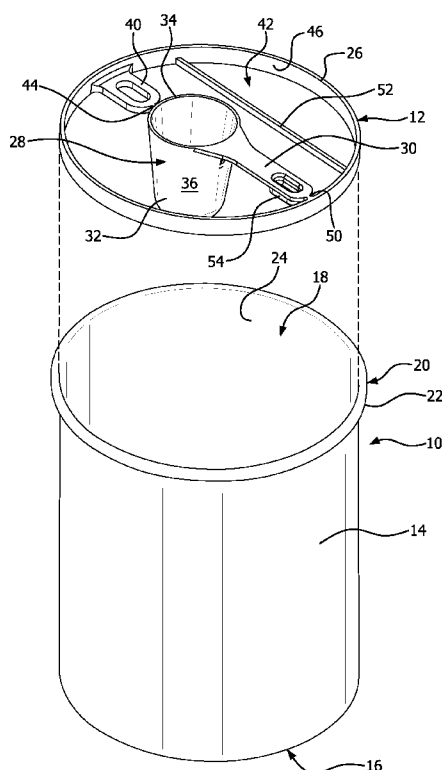

FIG. 1

(57) **Abstract:** An insert is provided for use with a container and for positioning in the container opening. The insert includes a body having an outer periphery dimensioned for receipt within the container opening. A utensil is frangibly secured to the insert body within an internal open area. A receiving tab is provided that projects from the body into the open area. An engagement structure is formed on the utensil and on the receiving tab. The engagement structure portions cooperate with one another for removably securing the utensil to the receiving tab after the frangible connection to the body is removed.
