ABSTRACT

Enhanced chemotherapeutic compositions against microbial infections in fish, the preparation and use thereof

The invention relates to enhanced chemotherapeutic compositions against microbial infections in fish, containing a benzylamine derivative of general formula

(I)

wherein R_1 to R_3 are defined as in claim 1, or a physiologically acceptable acid addition salt thereof and an effective amount of an antimicrobially active substance or a combination of such substances, preferably incorporated in feed, the preparation and the use thereof.
