(54) **Title:** BEAM REPORTING

500

FIG. 5

(57) **Abstract:** Various aspects of the present disclosure relate to beam reporting. In an aspect, a user equipment (UE) receives, from a base station, a downlink control information (DCI) for scheduling a physical uplink shared channel (PUSCH) for an uplink control information (UCI) transmission for event triggered beam reporting. The DCI is based on a first scheduling request (SR) for requesting the UCI transmission and includes an indication associated with at least one channel state information (CSI) report configuration for the event triggered beam reporting. The UE transmits, to the base station, the UCI transmission including a beam report.
