CLAIMS

1. Use of topical compositions comprising hyaluronic acid or salts thereof and iota-carrageenan, and at least one pharmaceutically acceptable excipient or carrier in the manufacture of a medicament for the treatment of viral infections caused by Herpesvirus.

2. The use according to claim 1, wherein the medicament further contains ascorbyl palmitate and choline alfoscerate.

3. The use according to one or more of claims 1 to 2, wherein the pharmaceutically acceptable carrier is a mucoadhesive matrix.

4. The use according to one or more of claims 1 to 3, wherein the hyaluronic acid or salt thereof is sodium hyaluronate.

5. The use according to one or more of claims 1 to 3, wherein the hyaluronic acid or salt thereof has an average molecular weight Mw ranging between 800,000 and 4,000,000 Da.

6. The use according to one or more of claims 2 to 5, wherein the iota-carrageenan concentration ranges between 0.0004 and 5.000% w/w.

7. The use according to one or more of claims 2 to 6, wherein the ascorbyl palmitate concentration ranges between 0.0004% and 0.050% w/v.

8. The use according to one or more of claims 2 to 7, wherein the choline alfoscerate concentration ranges between 0.001% w/v and 5.00% w/v.

9. The use according to one or more of claims 1 to 8, wherein the medicament is in the form of hydrogels, lipogels, anhydrous gels, O/W and W/O emulsions, solutions or suspensions.
