ABSTRACT

CONTROL METHOD AND CONTROL PROGRAM FOR SERVER

A control method and control program for a server, which select an ingredient list of content appropriate for a user that browses a menu item of a dish, are provided. The control method for a server includes: determining whether to use first ingredient name information indicating an official ingredient name in a birthplace of a dish or to use second ingredient name information indicating an ingredient name simplified from an official ingredient name in a birthplace of a dish; setting the first ingredient name information for ingredient list information of a dish that is provided at a facility (22) when it is determined to use the first ingredient name information (21), and setting the second ingredient name information for the ingredient list information (24) when it is determined to use the second ingredient name information (23); and outputting the ingredient list information to a user terminal (25).
