

ABSTRACT OF THE DISCLOSURE

Title of the Invention: POROUS SHEET, ABSORBENT ARTICLE USING
POROUS SHEET AND MANUFACTURING METHOD THEREOF

5

There is provided a porous sheet having an uneven surface
and a plurality of through holes formed therein. The porous
sheet is formed of a sheet including a higher density region
and a lower density region, one of which is interspersed in
10 another. The sheet is elongated to form the uneven surface
simultaneously with the through holes at the boundary portions
between the higher density region and the lower density region.
