(54) **Title**: DRIVE ASSEMBLY SUITABLE FOR USE IN A DRUG DELIVERY DEVICE AND DRUG DELIVERY DEVICE.

FIG 4

(57) **Abstract**: A drive.assembly (1) for use in a drug delivery device is proposed, the drive assembly comprising: a housing (2) having a proximal end (3) and a distal end (4); an axis (a) extending between the proximal end and the distal end; at least one drive member; a piston rod (6) adapted to be driven along the axis by the drive member, an indicator (5) adapted to provide positional information about a position of the piston rod relative to the proximal end, wherein the indicator and the piston rod are configured to convert a movement of the piston rod with respect to the housing into a rotational movement of the indicator. Additionally, a drug delivery device comprising the drive assembly is provided for.
