(54) Title: DEVICE AND METHOD OF GENERATING AND DISTRIBUTING ACCESS PERMISSION TO DIGITAL OBJECT

(57) Abstract: A system is provided, which includes at least one digital object owner client computing device, a trusted server computing device and at least one digital object consumer client computing device. Each of said at least one digital object owner client computing device is configured to transmit a created or amended access permission message to the trusted server computing device. The trusted server computing device is configured to generate, from the created or amended access permission message, at least one personalized access permission message, each of which is uniquely addressed to one of the at least one digital object consumer client computing device. The at least one digital object consumer client computing device is configured to enforce a download, from the trusted server computing device, of the at least one personalized access permission message uniquely addressed to the at least one digital object consumer client computing device.
