(54) Title: SHUFFLER DEVICE FOR GAME PIECES

(57) Abstract: The present invention relates to a shuffler device including a tub for receiving one or more game pieces. The game pieces can be, for example, revealer devices, cards, and dice or Mah Jongg tiles. The bottom of the tub includes a plurality of raised portions. Alternatively, the bottom of the tub can include a plurality of ball bearings. The tub is rotated and one or more game pieces can be removed from the tub. In an alternate embodiment, a slidable door is formed in the tub for receiving the revealer device or game pieces. The slidable door can be attached to a covered chute. In one embodiment, two connected tubs are used to each receive a set of revealer devices or game pieces.
