CLAIMS

1. A package comprising:

a body defining an interior compartment configured to house a consumable product and

a reservoir configured to house a substance capable of covering the consumable product when the package is placed in an upright position, and

at least one substantial~~ly~~ protrusion separating the interior compartment and the reservoir,

wherein a height of the protrusion height is lower than a height of the body and has a diameter that is ~~from about 20% to about~~ 50% less than a length of the body;

wherein the package is configured such that when the package is upright, at least a portion of the substance in the reservoir drains into the interior compartment.

2. The package according to Claim 1, wherein the protrusion is formed integrally with the body.

3. The package according to Claim 1, wherein the protrusion is formed as a separate component attached to the body.

4. The package according to Claim 1, wherein the protrusion extends substantially the entire width of the body.

5. The package according to Claim 1, wherein the protrusion is configured for use as a grip.

6. The package according to Claim 1, wherein the package has only one protrusion.

7. The package according to Claim 1, wherein the protrusion has a depth that is configured for gripping by a toddler.

8. The package according to Claim 1, wherein

a) the body has a shape selected from the group consisting of a circle, square, rectangle, triangle, quadrilateral, pentagon, hexagon, heptagon, octagon, nonagon, decagon, hexadecagon, icosagon, star, ellipse, semicircle, crescent, flower, cylinder, cube, cuboid, pyramid, cone, prism, and
