

Abstract

AUTOMATIC RAMP

- 5 An automatic ramp f comprises a ramp main frame for anchoring onto a floor; a first ramp board movably connected to the ramp main frame; a second ramp board movably connected to the first ramp board; and a drive mechanism that is connected to the first ramp board, the second ramp board or both for moving the ramp main frame, the first ramp board, the second ramp board or a combination of any of these. The ramp main
- 10 frame, the first ramp board, the second ramp board or a combination of any of these parts are telescopically extendable with respect to each other for providing a continuous surface.
