(54) Title: APPARATUS AND PROCESS FOR PACKAGING CONTAINERS OF LIQUID PRODUCTS INTO BUNDLES

(57) Abstract: The invention describes an apparatus for packaging groups (2) of containers (3), of liquid products into bundles. The apparatus comprises at least one pair of wrapping stations (101-102, 103-104, 105-106) of groups of containers. Each station comprises (700) means for wrapping an extensible film (4) around a group of containers and manipulating means (400) for feeding and discharging the groups of containers to/from the wrapping station, at least one feeding line (200) of the containers, and at least one discharge line (200) of the bundles. Advantageously, the feeding and discharge lines are shared between the different wrapping stations. It also describes a process for packaging containers in bundles.
