(54) Title: INTERCHANGEABLE GAMING LAYOUT POWERED BY A DISPLAY ELEMENT

FIG. 3

(57) Abstract: The present invention generally relates to an interchangeable gaming layout powered by a display element that shows the background graphics and table layouts of a gaming table. Specifically, embodiments of the present invention are configured to provide the background graphics and table layout for a gaming table that is presented by a full color display element and is conveniently reconfigurable between games without requiring the entire gaming table and/or layout to be resurfaced. Further embodiments of the present invention are configured to allow for the gaming table and/or layout to provide content (e.g., multimedia content) during downtime or other intermission periods in game play.
