

TRISPECIFIC BINDING PROTEINS AND METHODS OF USE

ABSTRACT

Provided herein are trispecific antigen-binding proteins comprising a domain binding to CD₃, a half-life extension domain, and a domain binding to a target antigen. Also provided are pharmaceutical compositions thereof, as well as nucleic acids, recombinant expression vectors and host cells for making such trispecific antigen-binding proteins. Also disclosed are methods of using the disclosed trispecific antigen-binding proteins in the prevention, and/or treatment diseases, conditions and disorders.
