Tango-Power-Extension-Cord.

Abstract

Tango-Power-Extension-Cord provide 2 separate panels for sockets to connect appliances and a user switch panel. Socket-panel can be placed separately near the appliances such as behind the TV-console, below table, etc whereas the user-switch panel can be placed where it can be easily accessible by the users – for example on TV console, on top of the table, etc. This is help in increase overall safety and also reduce wastage of electricity since users can easily switch off unwanted devices when not in use.
