

HARD DISK BURNISHING HEAD

ABSTRACT

The burnishing head (10) for hard disk processing includes a solid body (12) having generally rectangular surfaces, including an upper surface, (14) a burnishing pad surface, (118) a front surface, (22) a rear surface (26) and two side surfaces (28). A plurality of burnishing pads (20) are disposed upon the burnishing pad surface (18). The method for manufacturing the burnishing head (10), includes the steps of making a series of parallel cuts in a surface of a solid body of material. The burnishing pads (20) result from material that remains following the cuts.
