

**Slide-In Cluster Block Assembly****ABSTRACT**

5           An assembly for connection to a hermetic terminal of a compressor, a protector unit for connection to a hermetic terminal of a compressor, a cluster block unit for connection to a hermetic terminal of a compressor, and a method of electrically connecting a hermetic terminal of a compressor. The assembly comprises a protector unit for attaching to the hermetic terminal of the compressor;  
10       and a cluster block unit for housing contact elements for connection to pins of the hermetic terminal; wherein the cluster block unit is slidably moveable relative to the protector unit to engage the contact elements with the pins of the hermetic terminal of the compressor when the protector unit is attached to the hermetic terminal.
