(54) Title: GEAR BOX ARRANGEMENT

FIG. 1

(57) Abstract: The present invention relates to a gearbox system for mounting on a waterborne vessel with a hydrofoil, the gearbox system comprising: a housing having an interior surface defining an interior space of defined dimension; a gearing system comprising a propeller shaft engagement portion, the gearing system located within the interior of the housing; and an engine located within the interior space of the housing and in mechanical communication with the gear box; wherein the housing is water-tight and wherein the gearing system and engine are in thermal contact with the interior surface of the housing. Further provided is a hydrofoil system including such a gearbox system and a waterborne vessel including such a hydrofoil system.
