(54) **Title**: METHOD, APPARATUS AND SYSTEM FOR FAST SESSION TRANSFER FOR MULTIPLE FREQUENCY BAND WIRELESS COMMUNICATION

(57) **Abstract**: Devices, systems and methods to provide session transfer between a pair of multiband stations by a fast session transfer (FST) setup protocol. The FST protocol or the method may include operating the session on a first frequency band and/or a first channel wherein the session includes or is described by state information kept or stored in a pair of stations that have an established direct physical link; setting an agreement to operate the session on a second frequency band and/or a second channel; establishing a direct physical link on a second frequency band and/or a second channel and transferring the session to the second frequency band and/or the second channel.
