ABSTRACT

A method and an apparatus for generating a special effect for social interaction in a virtual environment of a game, a device, and a storage medium are provided and belong to the field of computer technologies. The method includes: (1201) displaying an object presentation interface of a target battle, the object presentation interface being used for displaying a plurality of virtual objects participating in the target battle; (1202) receiving a special effect generating instruction for a first virtual object of the plurality of virtual objects, the special effect generating instruction being used for instructing to generate a special effect based on the first virtual object, and the first virtual object being corresponding to the electronic device triggering the special effect; and (1203) generating the special effect in the object presentation interface.
