(54) **Title:** AN IMPLANTABLE DEVICE

(57) **Abstract:** An intramedullary bone device which has an internal lumen defined by a sidewall is described. The sidewall includes first and second perforated regions having respective first and second openings. The device also includes fluid flow directing features to direct the flow of a fluid from the internal lumen of the device through the openings in the sidewall of the device. The device may be part of a system with a fluid introducer member inserted through the internal lumen of the device. A method of securing and/or stabilising a bone including a fractured bone is also described.
