(54) Title: ADJUSTABLE ATTACHMENT DEVICE FOR FURNITURE

FIG. 1

(57) Abstract: An article of furniture includes a support and a plurality of members, each of the members extending along the bottom face of the support. Each of a plurality of attachment devices attaches a respective one of a plurality of legs to one of the members such that each of the members is attached to at least one of the legs. The attachment devices include multiple bodies and multiple fasteners. Each of the attachment devices are able to be adjusted as needed to account for slight manufacturing discrepancies that may occur due to manufacturing tolerance ranges so that the legs attached to the members via the attachment devices are positionable where desired in accordance with a predetermined design.
