

ABSTRACT

The present invention relates to a five-membered heterocyclic oxocarboxylic acid
5 compound and the medical use thereof. Specifically, the present invention relates to a
compound as represented by formula (I) and a pharmaceutically acceptable salt, prodrug,
hydrate, solvate or crystal form thereof, and also relates to a method for preparing the
compound, a pharmaceutical composition containing the compound, and the medical use
thereof as a secretion regulator of type I interferon, especially as a STING agonist, and in
10 the preparation of a drug for preventing and/or treating diseases related to type I interferon.
