(54) Title: METHOD AND SYSTEM FOR BILL MANAGEMENT

(57) Abstract: Methods and systems are disclosed which relate to online bill management via interface surfaces printed with information and coded data. The coded data, encoded visibly or invisibly, may be queried by an appropriate sensing device. The sensing device communicates with a computer system. Together, the interface surfaces, sensing device and computer system are capable of effecting online bill management, including bill payment, over a network.

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.
