RU, RW, SA, SC, SD, SE, SG, SK, SL, ST, SV, SY, TH,
TJ, TM, TN, TR, TT, TZ, UA, UG, US, UZ, VC, VN, WS,
ZA, ZM, ZW.

(84) Designated States (*unless otherwise indicated, for every
kind of regional protection available*): ARIPO (BW, CV,

(54) Title: LOST AND FOUND SOCIAL NETWORKING

FIG. 1

(57) Abstract: Methods, systems, and apparatus, including computer programs encoded on computer storage media, for identifying a lost acquaintance. In some implementations, a server receives a request from a first client device associated with a first user to enter a lost and found function in a social networking application. The server obtains items that describe a prior encounter between the first user and a different user. The server identifies potential candidates from among potential candidates in the lost and found function that match to the different user. The server provides data indicative of the potential candidates to the first client device. The server receives a connection request to one potential candidate from the first client device. The server transmits a first notification to a second client device associated with the one potential candidate. The server receives a request from the first client device to match with the second client device.
