(54) Title: DISTRIBUTED SECURE DATA STORAGE AND TRANSMISSION OF STREAMING MEDIA CONTENT

FIG. 4A

(57) Abstract: Disclosed is a method for the distrib-
uted storage and distribution of data. Original data is
divided into fragments and erasure encoding is per-
formed on it. The divided fragments are dispersedly
stored on a plurality of storage mediums, preferably
that are geographically remote from one another.
When access to the data is requested, the fragments
are transmitted through a network and reconstructed
into the original data. In certain embodiments, the
original data is media content which is steamed to a
user from the distributed storage.
