

Abstract

15 STATOR ASSEMBLY FOR A ROTARY MACHINE AND METHOD FOR MAKING
 THE STATOR ASSEMBLY

A stator assembly having an inner shroud assembly formed of
an inner shroud and rubstrip is disclosed. Various
20 construction details and features are developed which relate
to durability and manufacturing feasibility are developed.
In one detailed embodiment, at the rubstrip is bonded to the
thermoplastic shroud. And the method is applicable to
joining an elastomer, such as silicone rubber material, to a
25 thermoplastic substrate.
