(54) Title: PROTOCOL DATA UNIT RECOVERY

FIG. 8

(57) Abstract: Information can transfer from a transmitter to a receiver; however, the transmission can consume valuable resources. Therefore, a number of times a transmission is attempted can be tracked and compared against a threshold value. If the transmission occurs too many times - based upon the comparison - then a reset can occur. Tracking can occur for a protocol data unit and/or a control protocol data unit to determine if a reset should occur.
